

I drive a great deal in my job, and XM radio has become a welcome relief to the dial changing and program chasing that I used to do. It's not only more convenient, it's safer by virtue of eliminating the distraction of fooling with the radio, and also providing broadcast choices and weather information, that helps keep me alert!

I am looking for XM and satellite radio to expand their program offers to also include sports broadcast packages. For example, I want to be able to listen to the Braves baseball broadcast, or Alabama football anywhere I'm traveling!

Please do not restrict this technology that is becoming an asset to those of us who travel for a living!
